Subject: HV Sampling in January - Schedule  
AECOM is currently planning to sample the Newark Bay Study Area locations during the first full week of January 2012.

Monday January 7th will be a mobilization day. We will have some staff at the facility helping Gravity and OSI set up the vessels.  
Tuesday January 8th will be Newark Bay Northeast and Newark Bay South. Based on the previous schedule, we anticipate an EPA split at Newark Bay South.  
Wednesday January 9th will be Kill van Kull and 2 equipment blanks (time allowing). This will be where we collect the field duplicate sample for the Tierra data set.

We are currently working with OSI to obtain vessels and captains that may allow more than 6 passengers (8 people total) so that we can have oversight on the boats. I will keep you informed.

AECOM, please notify the laboratories and staff.

Rob, will you email EPA, or should I?

Thank you all, and have a merry holiday!

Kristen
